

## Pupil Personal Development

At Askwith Primary School, we ensure that the education children receive is not just about academic subjects but also includes their personal character development.

### Robust – Encouraging children to be strong and healthy

In addition to the Physical Education curriculum, children have the opportunity to take part in a wide range of sporting activities both during and after the school day. The Golden Mile and Team Building games have been offered at break times this year and there has been a wide range of after school sports clubs. Children take part in fitness sessions on a Monday afternoon and tennis lessons are also taking place this term during the school day for all children. On Friday 8<sup>th</sup> July, the whole school will take part in the annual school walk. Children learn about healthy food and a healthy lifestyle during PSHE lessons and assemblies.

### Resilient – Teaching children to withstand or recover from difficult situations

Children are taught that learning from mistakes is an effective way of learning. During assemblies and PSHE lessons, children learn to overcome friendship issues and how best to resolve disagreements. Children are encouraged to challenge themselves physically. The children in year 5 will take part in a Team Building day and the children in year 6 will go on a 2 night residential.

### Responsible – To learn to care for each other and school equipment

Children are placed in family groups, where children from all years are grouped together to discuss issues. This system encourages children to get to know and care for other children in different year groups and gives the older children the opportunity to take on responsibility for younger children. Each class also has class representatives which change each half term.

### Respectful – Learning to show respect for school staff, other adults and each other

This is modelled by staff on a daily basis and emphasised in the teaching of British values which is threaded through the curriculum.
